**Clinically Proven to Increase Fat-Loss
by an Unprecedented 1700%!**

Top weight-loss experts and medical researchers all over the world have been totally

compound available and I can say without hesitation that Xenadrine is far superior to all other thermogenic fat-loss formulas on the market today. This fact is clearly confirmed by the extraordinary results documented through this study. But these results were no surprise to me because I've personally lost over 65 pounds using this remarkable product."

But perhaps even more impressive than their extraordinary weight-loss is the dramatic improvements both subjects made in lean muscle composition thanks to Xenadrine's powerful muscle sparing effects. Look closely at the cutaway of Mike Piacentini's mid-section and you can fully appreciate just how significant these effects can be.

Case Studies Graphically Demonstrate Xenadrine's Extraordinary Fat-Burning/Muscle-Sparing Effects!

Test Subject Mike Piccerello's before and after photos graphically depict Xenadrine's incredible fat-burning/muscle sparing power. In just 10 weeks, Mike dropped an extraordinary 45 pounds of fat while packing on a phenomenal 12 pounds of lean muscle mass.

Mike Piccerello's mid-section completely metamorphosized in a mere 10 weeks thanks to Xenadrine's powerful fat-burning and workout enhancing effects.

Test Subject Nancy Letera had spent years trying to drop the excess weight, but it wasn't until she discovered Xenadrine that she saw significant results. In just 9 weeks, Xenadrine helped release Nancy from the stubborn bodyfat that had for so long held her back.

While Nancy and Mike's weight-loss is extraordinary and goes beyond what the average person may achieve, both individuals demonstrate what is possible when you combine consistent training with Xenadrine's scientifically-proven fat-burning power!

Test subjects involved in the clinical study also achieved a phenomenal reduction in overall bodyweight (19%) by using Xenadrine in conjunction with a very modest three hours per week of aerobic/anaerobic exercise. On the other hand, test subjects who took a placebo and followed the same exercise program actually gained bodyfat!

The Ultimate Energy Enhancer

As amazing as it sounds, Xenadrine's incredible benefits don't end with fat-burning and muscle preservation. As seen in the above before and after photos, both test subjects not only maintained their muscle tone they actually made dramatic improvements to it. This incredible feat was clearly a direct result of the dramatic increase in workout intensity both individuals experienced as a result of Xenadrine's powerful thermogenic boost. In other words, as Xenadrine ignites the fat-burning process, it also catapults your strength and energy to new heights. Simply put, Xenadrine's powerful thermogenic effects will provide you with the intense motivation and focus you need to train at the level necessary to not only reduce bodyfat but to stimulate real muscle gains. In fact, within twenty minutes of taking Xenadrine, you'll quickly understand why it has become the #1 performance enhancer among top level competitive athletes in virtually all sports that require extraordinary strength and power. Just in the world of pro football alone, Xenadrine has established a massive following like no other supplement in existence.

For example: Todd Sauerbrun of the Chicago Bears, considered one of the leagues most powerful punters uses Xenadrine before every one of his punting leg workouts to ensure maximum intensity and can continue to build his strength and main-

tain one of the longest punts in pro football. Another great example of Xenadrine's immense popularity in the NFL is wide receiver Alton Connell of the Washington Redskins, considered by many to be the strongest, most muscular wide receiver in the league. When asked in a recent magazine interview what his secret was for maintaining his phenomenal strength while keeping his bodyfat down so low, Alton told reporters "I've been using a supplement called Xenadrine which has helped me achieve significant reductions in bodyfat along with dramatic improvements in strength and energy."

Even the league's top strength coaches and trainers have quickly discovered the tremendous performance advantage this amazing powerhouse supplement can offer.

Attesting to that statement is renowned professional strength coach and celebrity trainer, Mike Akerson, MS, CSCS, HFI, whose client list includes superstar pro athletes like Orlando Solar, Penny Hardaway, Gerald Wilkins, Johnny Taylor, and Mike Sirota just to name a few. Mike says "Xenadrine is by far the greatest performance

enhancement compound I've ever seen. It has helped my guys break through the wall and achieve a performance level that was previously unattainable. I can't think of a better recommendation than Xenadrine for increasing strength and endurance while promoting rapid reductions in bodyfat!"

Xenadrine represents the most sophisticated natural diet supplement in the world. It is research-proven, medically approved, extremely effective, and 100% natural. Use it now and change the way you look and feel fast!

Xenadrine is available at better health food stores everywhere. To find the store nearest you call toll-free 1-888-CYTODYN (1-888-298-6396)
